

**New College Undergraduate Inquiry and Research Experiences (NCUIRE) program – 2019-2020
Request for Applications and Submission Guidelines**

Application Deadline: Friday, OCTOBER 4, 2019

For more information, contact NCUIRE@asu.edu or call 602.543.6934

Important Information and Revision Notes

- Only NCUIRE Research Assistantships and NCUIRE Team Awards are available.
- NCUIRE awards can support projects during Spring 2020.

Background

Undergraduate research is integral to the student-centered, interdisciplinary education that New College faculty provide to their students. Benefits provided to students, faculty, and campuses are manifold and well-documented. The **New College Undergraduate Inquiry & Research Experiences (NCUIRE, pronounced “Inquire”)** Program engages New College undergraduates in meaningful research partnerships with faculty and other undergraduate scholars.

Awards

To foster high-quality, high-impact research experiences, awards are made to support meaningful student-faculty collaborative research experiences. Four types of awards are supported by NCUIRE: **NCUIRE Research Assistantships, NCUIRE Team Awards, NCUIRE Scholarships, and NCUIRE Fellowships**. Features of each are detailed below and summarized in Appendix A.

NCUIRE Research Assistantships allow students to participate in research early in their college careers. In particular, these awards are intended for students with little to no prior research experience. The duration of the awards is a single semester or summer session. Research Assistants generally work closely with other student researchers to begin to learn the craft of inquiry. Research Assistants are not expected to commit as much time to the NCUIRE project as NCUIRE Scholars and Fellows (see Appendix A). It is anticipated that most students applying for NCUIRE Research Assistantships will be freshmen or sophomores. The application process is brief and consists of: 1) a summary of the student role in the project articulated and submitted by the faculty mentor and 2) a brief (100 words or less) statement provided to the proposed faculty mentor by the student describing why s/he wishes to participate in NCUIRE and the creative/research project.

NCUIRE Team awards allow teams of two or more (typically not more than six) students to collaborate with one another under the guidance of a single faculty mentor on a single creative/research project. As is the case with NCUIRE Research Assistantships, the duration of an NCUIRE Team award is a single semester or summer session. NCUIRE Team awardees are expected to commit to the project an amount of time comparable to that of NCUIRE Research Assistants (see Appendix A). As with NCUIRE Research Assistantships, no prior experience with research or creative endeavor is required; however, NCUIRE Team awards provide opportunities for students with varying levels of experience to partner and collaborate in synergistic ways. For example, team members with some experience in research and creative endeavor can support and mentor other team members with less experience. For NCUIRE Team awards with four (4) or more student team members, a \$500 supplies budget is included.

The application consists of: 1) a brief summary of the objective(s) of the team and anticipated contributions of each team member articulated and submitted by the faculty mentor, and 2) brief (100 words or less) statements provided to the proposed faculty mentor by each prospective team member describing why s/he wishes to participate in NCUIRE and the creative/research project.

NCUIRE Scholarships support students who are beginning to understand and appreciate the nature of research, inquiry, and creative activity. NCUIRE Scholars may have had some prior research experience, but this is not necessary. For example, prospective NCUIRE Scholars may have begun to learn about research and inquiry in relevant coursework. It is anticipated that most students applying for NCUIRE Scholarships will be sophomores, juniors, or seniors. The application process is proposal-based and requires the student applicant and faculty mentor to co-author a proposal. The duration of these awards is either an academic year (two semesters) or a summer (both summer sessions).

NCUIRE Fellowships support prior NCUIRE Scholars as they continue to advance their research. Prospective NCUIRE Fellows need not necessarily work with the same faculty mentor with whom they worked as NCUIRE Scholars. It is anticipated that most students applying for NCUIRE Fellowships will be juniors or seniors. The application process is proposal-based and requires the student applicant (often, but not necessarily, a former NCUIRE Scholar) to demonstrate a clear and primary role in authoring the proposal. The duration of the awards is either an academic year (two semesters) or a summer (both summer sessions).

NCUIRE Research Assistants should anticipate time commitments of 5 hours per week for academic year awards and 80 total hours for summer awards. NCUIRE Team awardees should anticipate time commitments of 4 hours per week for academic year awards and 64 total hours for summer awards. NCUIRE Scholars and Fellows are expected to work 10 hours per week during the semester. For summer awards, NCUIRE Scholars and Fellows are expected to work 320 total hours. All awards include a student stipend OR academic credit (see Appendix A), and a budget for supplies for the project (up to \$500) is provided to support projects conducted by NCUIRE Scholars and Fellows as well as projects conducted by NCUIRE Teams composed of four (4) or more students.

Items eligible for purchase using NCUIRE supplies funds must be essential to conducting the specific research activities outlined in the proposal. Funds for supplies that accompany NCUIRE awards cannot be accessed beyond the last semester during which the award was active.

Stipends will be paid in installments OR academic credit will be awarded after satisfactory progress reports are submitted to the NCUIRE program via the NCUIRE webpage.

All students receiving funding or academic credit for participation in NCUIRE program are required to participate in activities that foster a sense of community among cohorts of NCUIRE awardees. All awardees are required to present results and/or progress at the New College Undergraduate Research Symposium and at additional relevant events that highlight undergraduate research in New College.

Eligibility

Only ASU New College students (students with majors in New College) can receive NCUIRE stipends, but any ASU student working with a New College faculty member is eligible to receive academic credit (students who choose the credit option must pay tuition for these credits).

Students

For academic year awards, students must be enrolled in at least 6 credits during each semester of the award. For summer awards, students must be enrolled in at least 6 credits in the fall following the summer award. Students may submit a single application.

Participation in the NCUIRE Program by Barrett Honors students is encouraged and represents an extraordinary opportunity to enhance the Barrett experience. Research and creative activity supported by the NCUIRE program and performed as part of Barrett thesis research need not be entirely separate. Indeed, Barrett students might consider using their NCUIRE research in their required honors thesis. NCUIRE applicants should be aware that NCUIRE faculty mentors typically require NCUIRE participants to present results of their research via mechanisms (poster presentations, oral presentations, publications, etc.) that are in addition to the Barrett thesis.

Students are especially encouraged to share their findings and research experiences at the New College Research Symposium and informal NCUIRE brownbag presentations.

Faculty

Faculty with contractual research assignments (tenured, tenure-track, and others such as clinical faculty and professors of practice with contractual research assignments) are eligible to support NCUIRE Research Assistant, NCUIRE Team, NCUIRE Scholar, and NCUIRE Fellow applications. In each application cycle, these faculty can support no more than:

- two (2) total NCUIRE Scholarship and NCUIRE Fellowship applications AND
- NCUIRE Research Assistantship OR NCUIRE Team applications supporting no more than a total of six (6) students.

Lecturers are encouraged to participate in NCUIRE by supporting NCUIRE Research Assistant and Team applications. Lecturers may support no more than a total of six (6) student applications via NCUIRE Research Assistantships OR NCUIRE Team applications. In recognition that Lecturers' service as an NCUIRE mentor is in addition to their contractual assignments, Lecturers will receive a \$150 stipend for each NCUIRE Research Assistant or NCUIRE Team mentored.

For faculty with less than full-time assignments, the number of applications that can be supported is reduced according to the percent assignment. For example, a Lecturer with a 66% (0.66) assignment is eligible to support up to four (4) NCUIRE Research Assistantship applications ($0.66 * 6 \text{ applications} = 4 \text{ applications}$).

Projects

All research and creative activity conducted by New College faculty with New College students is eligible for NCUIRE support. NCUIRE funds are intended to support student-faculty collaborative research and creative activity.

Applicants with questions regarding whether a potential project is eligible for NCUIRE support are encouraged to contact the NCUIRE program director (NCUIRE@asu.edu) prior to submitting an application.

Projects to be funded by mentor-identified, external support can be submitted to the NCUIRE program at any time. All applications will be evaluated using the review criteria detailed in Appendix B and C. For additional information, contact the NCUIRE program director (NCUIRE@asu.edu).

NCUIRE Research Assistant and NCUIRE Team Application Guidelines and Review

- All applications must be submitted by midnight on **Friday, OCTOBER 4, 2019**
- Applications are submitted online via the "How to Apply" function of the NCUIRE webpage (<http://ncuire.asu.edu>)
- An overview of the project and the role of student(s) in the project is articulated by the faculty mentor in a brief statement submitted online. Each student provides to the faculty member a statement (100 words or less) describing why s/he wishes to participate in NCUIRE and the creative/research project.
- If a faculty member is supporting more than one application, each application must be unique and tailored to each student's particular interests, background, goals, and aspirations.

- NCUIRE Research Assistantships and Team Awards are intended to support students with very little to no prior research experience.
- Applications will be reviewed using the using criteria detailed in Appendix B. Proposed activities and outcomes should be described as specifically as possible using language and terminology readily comprehensible by readers outside of the discipline.
- Only ASU New College students (students with majors in New College) can receive NCUIRE stipends
- Please forward questions, comments, or requests for feedback on unfunded applications to NCUIRE@asu.edu

Appendix A: Features of the three types of NCUIRE Awards

Award Type	Award Amount	Duration	Time Commitment	Application
NCUIRE Research Assistant	\$625 stipend OR 2 credits (499, etc.)	One semester or one summer session (session A or B)	6 hours per week (semester award); 96 total hours (summer award)	Brief application with project overview and student role articulated by faculty mentor
NCUIRE Team	\$625 stipend per student team member OR 2 credits (+ \$500 supplies for teams with 4 or more members)	One semester or one summer session (session A or B)	6 hours per week (semester award); 96 total hours (summer award)	Brief application with project overview and student team member roles articulated by faculty mentor
NCUIRE Scholar	\$2,500 stipend OR 6 credits (499, etc.) + \$500 supplies	One academic year or one summer (both summer sessions)	9 hours/wk (academic year award); 288 total hours (summer award)	Proposal-based application in which student and faculty mentor co-author proposal
NCUIRE Fellow	\$3,000 stipend OR 6 credits (499, etc.) + \$500 supplies	One academic year or one summer (both summer sessions)	9 hours/wk (academic year award); 288 total hours (summer award)	Proposal-based application in which student (former NCUIRE Scholar) has a clear and primary role in authorship

Appendix B: NCUIRE Research Assistantship and NCUIRE Team Application Review Criteria

Item	Response (1 = strongly disagree; 5 = strongly agree)				
Descriptions of activities the Research Assistant/each Team member will perform are complete and readily comprehensible by readers outside of the discipline.	1	2	3	4	5
Activities the Research Assistant/Team member will perform are appropriate to her/his level of prior experience in research and/or relevant coursework. (NCUIRE Research Assistantships and Team awards are intended to support students with very little to no prior research experience.)	1	2	3	4	5
Activities the Research Assistant/Team members will perform can be accomplished during the timeframe in which funding is requested.	1	2	3	4	5
The Research Assistant's/Team member's research skills will be developed through mentoring by the faculty mentor and/or other student researchers.	1	2	3	4	5
The student applicant(s) has/have clearly articulated why s/he wishes to engage in NCUIRE and participate in the proposed work.	1	2	3	4	5

Comments:

Appendix C: NCUIRE Scholarship and Fellowship Application Review Criteria

Item	Response (1 = strongly disagree; 5 = strongly agree)				
A clear description of the research problem/question and/or the creative goal to be addressed is provided.	1	2	3	4	5
A lucid overview of the methodologies to be employed is presented.	1	2	3	4	5
The student will receive professional benefits from participating in the activities described in this application.	1	2	3	4	5
The project appears feasible.	1	2	3	4	5
The timeline is reasonable, adequately detailed, and demonstrates that the outcomes of the project will be realized.	1	2	3	4	5
Meaningful outcomes and/or products (e.g., publications, presentations at regional/national meetings, etc.) will result from this work.	1	2	3	4	5
Funds requested for supplies are well-justified and required for the work described in the application	1	2	3	4	5
The application appears to have been crafted jointly by the student and faculty collaborator (for NCUIRE Scholars) or primarily by the student (NCUIRE Fellows).	1	2	3	4	5
